

Open Access Service – Speech Therapy

About Open Access Services

Open Access Services is a programme by Woodlands Hospital (WH) that allows patients seeking medical attention at primary care facilities to have direct referral access to endoscopy, minor surgery, advanced imaging, and allied health services, bypassing the need for a specialist consultation.

Why Am I Being Referred for this Service?

Children and adults with these three **communication difficulties*** can be referred directly from CHAS GP clinics and NHG Polyclinics to WH Speech Therapy for assessment and intervention. This minimises the waiting time to see a speech therapist.

Communication difficulty 1: Stuttering / Stammering

- Individuals with a history of developmental stuttering beginning in childhood, that persists into adulthood

Communication difficulty 2: Speech Sound Disorders

- Children aged 3 and above who have difficulty pronouncing words

Communication difficulty 3: Primary Progressive Aphasia

- Adults aged 40 years and older who experience a progressive deterioration in language abilities for at least 3-6 months
